Skills

Languages: JavaScript, HTML & CSS, MySQL

Technologies & Tools: React, Vite.js, APIs, Next.js, Tailwind

Project Work

Open-source Projects (2023 – Present)

Software Development Engineer

Working on open-source projects on GitHub, fixing issues, and adding features.

Portfolio Project

Software Development Engineer

• Developed an interactive online portfolio to showcase my skills and experiences. The portfolio serves as practical demonstration of front-end development proficiency and personal creativity, emphasizing responsive design and user-friendly navigation.

• JavaScript, HTML, CSS, React, Vite.js

Steam App (2023)

Software Development Engineer

• A innovatively designed gaming platform that shows the current most popular games. The application is fetching the data from an API. The application features functionalities including sorting the games by category, user reviews and community interactions.

• JavaScript, HTML, CSS, React, APIs

Weather App (2023)

Software Development Engineer

• A simple weather app for displaying the current weather at cities all over the world.

• JavaScript, HTML, CSS, React, Vite.js, APIs

Night Club (2023 – Present)

Software Development Engineer

• Creating a dynamic web application for a virtual night club experience, where the songs will be fetched from Spotify API and visualize the beats of the music on the screen.

• JavaScript, HTML, CSS, React, Tailwind, Next.js

Education

University of Food Technologies

Sept 2017 – Present

Incomplete B.E. in Computer Science and Engineering

Took a break after completing my second year of university studies. Currently resuming my academic pursuits to complete my computer science and engineering degree.

Professional School in Home Appliances

High School Diploma in Computer Systems Networking and Telecommunications

Sept 2012 – May 2017

• Learnt how to build computers from scratch, and build networks.

Work Experience

- **Sales Representative at ARTE-5YA**

Aug 2020 – Present

- Actively working and talking with customers, building strong relationships with them, assisting them in the selection and design of their apartments, while also creating offers. Excelled in problem-solving, often identifying and resolving challenges related to the design, additionally, played a key role in training the new staff members, sharing them my knowledge and techniques for effective customer service.

Awards and Certificates

- JavaScript Advanced at SoftUni Academy: Gained experience in the DOM manipulations and events, about the class constructor and the prototypal inheritance.
- JavaScript Fundamentals at SoftUni Academy: Learnt the fundamental array operations, arrow functions, function encapsulation and OOP programming.
- Advanced React at Meta on Coursera: Learnt about the States and the Properties, how to implement the React hooks.
- React Basics at Meta on Coursera: Learnt about the DOM, how to create components, manipulate props, and how to use the components for visual results.
- HTML and CSS in depth at Meta on Coursera: Gained knowledge about the semantic tags and input types.
- Front- End Development at Meta on Coursera: Learnt how the Front-End is working and the DOM.
- Programming JavaScript Basics at SoftUni Academy: Gained knowledge on how to work with variables, conditional statements and loops.
